Dear George:

As a result of recent changes, you will now receive your 14 System 3's as follows: 9 modified and 5 unmodified. It therefore becomes desirable to revise the System 3 FAK and Depot listings in order to properly support your new mix of modified and unmodified System 3's. We suggest that your three FAK lists be supplied with etched circuit boards in accordance with Exhibit A, attached.

In addition to the FAK changes, the etched board assemblies in the Depot listing should also be changed. Exhibit B, attached, suggests a mix of boards to support both the modified and the unmodified systems.

It is our opinion that the indicated dispersion of circuit boards will best support your systems. This distribution can be effected without change in the equipment already shipped you and with changes easily made in existing production schedules. Unless you advise us to the contrary, we will change our production and shipping schedules accordingly.

A copy of this letter and the exhibits is being sent to Bob W.

Sincerely,

*Bob*  
Bob
